

Saturn retrofit solution | Extending street scene design life

Our Paragon LED upgrade combines efficiency with usability, changing the way we upcycle forever. An elegant and efficient lighting solution to upgrading your street lighting to LED whilst maintaining the classic style of the Urbis Saturn.

The paragon upcycle to LED is as quick as a lamp change, allowing you to schedule as part of ongoing and already budgeted maintenance.

We take maintaining the overall appearance of the lantern very seriously. In the case of the Urbis Saturn, the Paragon upcycle is fully integrated and sympathetic to the existing design. Paragon is designed to replace the existing lamp and bowl but retain the original canopy.
